HOUSING DIVISION

Arthur F. Young, Chief

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1970 census. Primary direction of the program was performed by **Conrad Taeuber**, former Associate Director for Demographic Fields, assisted by **David L. Kaplan**, 1970 Census Coordinator, and in conjunction with **Paul R. Squires**, Associate Director for Data Collection and Processing, and **Joseph Waksberg**, Associate Director for Statistical Standards and Methodology.

This report was planned and written in the Housing Division under the supervision of **Arthur F. Young**, Chief, by **Aaron Josowitz**, Assistant Division Chief, **Aneda E. France**, and **Leonard J. Norry**; assisted by **Robert W. Bonnette**, **Jane S. Maynard**, and **Edward D. Montfort**.

The procedures for sample selection, sample weighting, and computation of sampling variances were developed in the Statistical Methods Division, under the supervision of **Morton Boisen**, Chief, and **Robert H. Hanson**, Assistant Division Chief, assisted by **William T. Alsbrooks**, **Peter A. Bounpane**, **Barbara A. Boyes**, and **Carlton W. Pruden**.

Geographic plans and procedures were developed in the Geography Division under the supervision of **William T. Fay**, then Chief, and **Robert C. Klove** and **Gerald J. Post**, Assistant Division Chiefs.

Data collection activities were administered by the Field Division, **Richard C. Burt**, Chief, and **Dean H. Weber**, Assistant Divi-

sion Chief, with the assistance of the directors of the Bureau's data collection centers.

Systems and processing procedures were developed under the direction of **Morris Gorinson**, Assistant Chief, Demographic Census Staff. **Florence Wright** assisted by **John F. Powell** and **Orville M. Slye**, was responsible for the clerical procedures and **Roger O. Lepage**, assisted by **Clarence P. Gillis**, **Ruth F. Hieta**, **John R. Murphy, Jr.**, and **Richard R. Warren** was responsible for the computer programming. **Donald R. Dalzell** was responsible for the computer procedures and programs used for the electronic preparation of the tables in this report.

The manual processing and microfilming of the questionnaires and the review of tabulation controls were performed in the Data Preparation Division (formerly Jeffersonville Census Operation Division), under the direction of **Robert L. Hagan**, then Chief, with the assistance of **Rex L. Pullin**. **William L. Pangburn** supervised the microfilming operation. **Dan N. Harding**, assisted by **Nora H. Shouse**, was responsible for the tabulation review work, in which **Peter J. Fronczek** also made important contributions.

FOSDIC and computer processing were performed in the Computer Services Division under the supervision of **James R. Pepal**, Chief, and **E. Richard Bourdon** and **James W. Shores**, Assistant Division Chiefs. Development of the FOSDIC equipment was directed by **William M. Gaines**, Assistant Division Chief, and **McRae Anderson**. Devel-

opment of the automatic microfilming equipment was directed by **Anthony A. Berlinsky**.

Publications planning, editing, composition, and printing procurement were performed in the Publications Services Division, **Raymond J. Koski**, Acting Chief, by **Milton S. Andersen**, **Gerald A. Mann**, and **Wayne H. Massey**.

Important contributions were made by **Robert B. Voight** and **Sherry L. Courtland** in the planning and coordination of the 1970 census program; by **Lucille D. Catterton** in the planning of the tabular materials; and by **John W. H. Spencer**, **Sol Dolleck**, and **M. Douglas Fahey** in the systems design and operations for processing the census data.

GENERAL

This report from the 1970 Census of Housing presents data on housing and household characteristics cross-classified by year household moved into unit. Data are shown for the United States and for each region. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

This report is one in a series of subject reports comprising Volume VII (see list on page II). Each report in this volume concentrates on a particular subject. Detailed information and cross-classifications are generally provided on a national level; in some reports, data for States or standard metropolitan statistical areas (SMSA's) are also shown. For a description of the full data dissemination program of the 1970 Population and Housing Census, see Appendix D, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and

extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For most of the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960. Further information on comparability appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through D, which appear after the tables. The material in these appendixes applies to this report as well as to other reports in this series; therefore, some terms defined in the appendixes may not appear in the tables of this report. Appendix A describes the various area classifications (e.g., inside and outside SMSA's, urban-rural, etc.) and also explains the residence rules used in counting the population. Appendix B provides definitions and explanations of subjects covered in this series. Appendix C presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix D summarizes the data dissemination program.

Content of the tables.—Statistics are presented separately for household heads who moved into their present housing units within 5 years of the

1970 census (moved in after April 1, 1965) and those who were living in their present units 5 years or longer (moved in April 1, 1965, or earlier). In tables 1 and 2, household heads who moved into their units within the past 5 years are further subdivided into more detailed "year moved" categories.

A series of standard tables is presented for each area shown in this report. Tables 1 through 5 present statistics for owner-occupied and renter-occupied housing units, tables 6 through 10 for units with Negro head of household, and tables 11 through 15 for units with head of Spanish language. The table finding guide on page III lists the characteristics covered in this report and shows the tables in which the various types of statistics appear.

The prefix letter "A" has been assigned to the series of tables for the United States as a whole; prefix letter "B" for the Northeast region; "C" for the North Central region; "D" for the South region; and "E" for the West region.

Sample size.—The statistics presented in this report are based on a sample of housing units. More specifically, the data are derived from the 15-percent sample questionnaires (see "Data Collection Procedures," below). Appendix C, "Accuracy of the Data," presents information on the sampling variability and the ratio estimation procedure associated with these data.

Derived figures (percents, medians, etc.).—Percents and medians as well as

certain rates and ratios are shown in this series of reports. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median.

Medians for value and income are rounded to the nearest hundred dollars and for rent to the nearest dollar. In computing median rent, units reported as "no cash rent" are excluded. The median school years completed by head was computed after the statistics on years of school completed had been converted to a continuous series of numbers (e.g., completion of the 1st year of high school was treated as completion of the 9th year and completion of the 1st year of college as completion of the 13th year). Heads completing a given school year were assumed to be distributed evenly within the interval from 0.0 to 0.9 of the year. When the median falls in the lower terminal category of an open-end distribution, the method of presentation is to show the initial value of the next category followed by a minus sign. Thus, for example, if the median for "Value" falls in the category "Less than \$5,000," it is shown as "\$5,000—"; and if the median for school years completed falls in the category "8 years or less," it is shown as "9.0—." When the median falls in the upper terminal category of an open-end distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; thus, for example, if the median falls in the category "\$50,000 or more," it is shown as "\$50,000+."

For all types of derived figures in this report, the figure is not presented (but indicated by three dots "...") if

there are fewer than the prescribed number of units in the distribution or the base. For this report, the minimum number of housing units is 132. Percents which round to less than 0.1 are not shown but indicated as zero (i.e., "--").

Symbols.—A dash "--" signifies zero. Three dots "..." mean not applicable, or that the base for a derived figure is too small for it to be shown. In the processing of "year structure built" and "year head moved into unit," inconsistent entries between the two items were not edited. Therefore, in the cross-tabulations between these two items, there were a few inconsistent entries, although some may result from people moving back into former residences.

Unpublished data.—For some of the Volume VII reports, statistics in addition to those published in the report are available on a reimbursable basis. For example, data presented for the United States as a whole are available for each State, division, and region; and for each of these, data may be obtained for the area total; inside SMSA's; in central cities; not in central cities by urban and rural; and outside SMSA's by urban and rural. Requests for unpublished data, giving a specific description of the figures desired, may be made by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible, because tape files are not maintained indefinitely.

DATA COLLECTION PROCEDURES

The 1970 census was conducted primarily through self-enumeration. In

1960, self-enumeration was first introduced on a nationwide scale as a substitute for the traditional census direct interview.

A census questionnaire was delivered by postal carriers to every household several days before Census Day, April 1, 1970. This questionnaire contained certain explanatory information and was accompanied by an instruction sheet; in areas with comparatively large proportions of Spanish-speaking persons, a Spanish version of the instruction sheet was also enclosed.

In the larger metropolitan areas and some adjacent counties, altogether containing about three-fifths of the population of the United States, the householder was requested to fill out and mail back the form on Census Day. Approximately 87 percent of the householders did so. The mailed-back forms were reviewed by the census enumerator (or, in some localities, a census clerk) and if the form was determined to be incomplete or inconsistent, a followup was made. The bulk of these followups were made by telephone, the rest by personal visit. For the households that did not mail back their forms, a followup was also made, in almost all cases by personal visit and in the remainder by telephone; vacant units were enumerated by personal visit.

For the remaining two-fifths of the population, the householder was requested to fill out the form and give it to the enumerator when he called; approximately 80 percent did so. Incomplete and unfilled forms were completed by interview during the enumerator's visit.

Three types of questionnaires were used throughout the country: 80 percent of the households answered a form containing a limited number of

population and housing questions and the remainder, split into 15-percent and 5-percent samples, answered forms which contained these questions as well as a number of additional questions. Some of the additional questions were the same on the 15-percent and 5-percent versions; others were different. A random procedure was used to determine which of the three forms any particular household answered.

In the metropolitan and adjacent areas, the designated type was sent to each household. In the remaining areas, the questionnaire with a limited number of questions was distributed to all households and the enumerators

interviewed for the additional questions in those households designated for the 15-percent and 5-percent samples.

PROCESSING PROCEDURES

The 1970 census questionnaires were specially designed to be processed by FOSDIC (Film Optical Sensing Device for Input to Computers). Respondents and enumerators (and for some few items, census clerks) marked the answers in predesignated positions which could be "read" by FOSDIC from a microfilm copy of the ques-

tionnaire onto computer magnetic tape.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps (see Appendix C, "Accuracy of the Data"). One of the end results of this operation was a computer tape from which the tables in this report were prepared on a cathode-ray-tube phototypesetting machine at the Government Printing Office. Another end result was the summary tapes which are available for purchase, as described in Appendix D, "Publication and Computer Summary Tape Program."
